

Bosch Motorsport EV14 Injector 630cc Standard Body

Brand: Bosch Motorsport
Product Code: BOS0280158298
Availability: 7 Days
Weight: 0.10kg
Dimensions: 5.00cm x 2.00cm x 2.00cm

Price: \$126.50

Description

These injectors are the EV14S type from Bosch Motorsport. They are very popular for use in GM LS engines as well as Dodge SRT8, especially with a supercharger. They are also used as OEM fitment on Ford GT's and Shelby GT500 models.

EV 14 injection valves are the latest revision of the EV 6 injection valve technology. EV 14 xT are the latest revision of the EV 12. EV 14 is designed for a wide range of flow rates and spray patterns. Compact size and three standard versions simplify mounting in a variety of applications. These are genuine Bosch injectors with all of the correct markings.

This fuel injector has 4 center holes with 12 additional holes evenly-spaced and radiating around the outer edge of the nozzle plate. The flow pattern is split into two streams that fire at 45 degrees.

OEM Equivalent

- Ford DR3Z-9F593-A
