Short Description

The C1212 is a model in MoTeC's range of Displays and Display Loggers, featuring an impressively generous, high resolution, full colour screen. Stylishly designed with powerful functionality, the C1212 provides all the benefits of a sophisticated display plus data logging and auxiliary control in one streamlined device.

Description

The C1212 is a model in MoTeC's range of Displays and Display Loggers, featuring an impressively generous, high resolution, full colour screen. Stylishly designed with powerful functionality, the C1212 provides all the benefits of a sophisticated display plus data logging and auxiliary control in one streamlined device.

This model also includes a composite video input as standard (e.g. for a rear vision camera), and USB Logging to a removable storage device as an optional upgrade.

Measuring 311mm (approx. 12 inches), the ultra bright C1212 screen is vibrant and anti-reflective, making it easy to view in direct sunlight. Numerous selectable layouts are supplied with configurable channels, labels and colour schemes. Or,

for the flexibility to treat your screen as a blank canvas and design your own layout with unique graphics, sponsor logos, custom icons and gauges, opt for the Display Creator upgrade.

The C1212 is available standalone or as part of MoTeC's C1212 Race Kits.
