

Compsystems 10 Channel Analog to CAN Expansion Module

Brand: Competition Systems

Product Code: 63-012A

Availability: 7 Days

Weight: 0.20kg

Dimensions: 10.00cm x 6.00cm x 5.00cm

Price: \$412.50

Short Description

This module is designed to collect readings from up to ten 5V sensors and retransmit it as one CAN packet. This is perfect for expanding the scope of your data logger or engine control unit or even just simplifying your wiring harness by sending all of the chassis sensors at either end of the car over two wires.

Packaged in a high temperature, impact resistant polymer housing and with an IP67 sealed 12 pin DTM connector, this module is both compact and light weight.(approx 175 grams).
