Short Description

Nitron R1 suspension kit for the Renault Megane 250/265 including front strut top mounts. Ideal for fast road and track driving.

As part of the process, we will contact you regarding specific valving requirements dependant on what useage you will have.

Description

The NTR R1 system offers unrivalled performance and value with a design that gives drivers a wide range of effective, easy to use damping control.

2-Way combined damping adjustment. Developed from our full race suspension and sharing many components with the R3 system, the R1 offers exceptional performance, reliability and value for both road and track use. Widely praised by drivers around the world and respected for out-performing considerably more expensive suspension kits.

R1 kits provides uncompromising quality, reliability and performance without the need for a remote canister. Fade-resistant and hand built with ultra-low friction

components, the R1 shock is made to last on the road and track.

The high-grade materials protect against corrosion whilst reducing weight. Every R1 kit is custom built, sprung and fully serviceable. Titanium and hard-anodised parts are hand built to last not only season after season, but also the harshest of winters.
